

## Parasports fencing

Parasports ball court fencing systems can be seen in parks and schools all over the UK, providing high performance and attractive fencing with excellent through visibility and a high level of boundary security.

Our multi-purpose ball park solution is also very much at home in professional sports grounds, as it offers a safe and robust perimeter for most ball sports. The purpose-designed panels have been manufactured for rigidity and resistance to impact, and reflection within the ball park panel also offers added levels of ball rebound. Available in standard RAL colours, its competitive price has led Parasport ball park solutions to be specified for use around recreational facilities, and school sports fields.

- ✓ Excellent resistance to impact
- ✓ Aesthetic design with good see through visibility
- ✓ Excellent ball rebound characteristics
- ✓ Protection of sports grounds, ball courts and parks with optional lockable gates

Paramesh sports fences are based on the trusted Paramesh 868 design, consisting of a 200mm x 50mm welded mesh, which features twin 8mm horizontal wires positioned either side of a 6mm diameter vertical wire. The bottom 1.2m of the fence is reinforced with additional wires to form a closer mesh pattern that creates a ball rebound area.

A complementary range of single- or double-leaf gates is available to match the high specification of Parasports ball court systems. We can also supply locking solutions to suit most applications, including electric locking and card access control for pedestrian control into members' areas. Access gates are fitted with long-life hinges as standard on all Parasports Ball Court systems. Designed with the benefit of over 30 years' experience, the reliability of our ball park gates ensures their suitability for areas with heavy footfall. Adjustable hinges allow for different levels and varying ground surfaces and are supplied as standard equipment on all our access gates.

## Innovative British Fencing Solutions

### Autocad Design

Our state of the art drawing office uses the latest in Autocad design ensuring both compatibility and accuracy with your individual site requirements.

### UK Manufacturing

Paramount Steel Fence has manufactured in the UK since 1984. With over 30 years of experience we can provide secure solutions for use in most environments.

### Long Life Cycle

All of our products are designed to provide the end user with years of trouble free service. We offer Galvanising, Pre treated systems, and Powder coating in any RAL colour within our product portfolio.

### National Deliveries

Operating a national fleet of HGV vehicles including rigid lorries and articulated units, ensures we maintain fast and reliable distribution of our products around the UK.

Fence panels are retained to the posts using a full length fixing bar, this provides additional strength and impact resistance.

The fixing bar also makes it difficult to remove the fence panels from the post, offering increased security and lowering the risk of vandalism to the ball court or sports area.

Optional fixing accessories can be specified to mount basketball hoops and other third party sports equipment. Please contact our sales team if you have a special requirement.

Typical applications include hockey pitches, skate parks, rugby pitches, tennis courts, and football pitches.

Parasports ball park systems are the preferred solution for upgrading from chain link fence; they are ideal ball court solutions, adding a modern and contemporary feel to any sports arena.

Applications include:

- ✓ Hockey Pitches
- ✓ Tennis courts
- ✓ Badminton courts
- ✓ Golf driving ranges
- ✓ Basketball courts
- ✓ Inner city Football pitches
