

Pararail pedestrian guard rail

Pararail is a welded fencing system designed to meet the requirements of low risk pedestrian demarcation.

Designed to fulfil a wide range of applications including sports fields, flower beds, parks or gardens, and even tree surrounds, the product has also been used successfully around statues and objects of specific interest to the general public as a permanent or temporary solution.

Pararail is a versatile product limited only by the imagination of its specifier, architect or consultant. The product's versatility makes it ideal for deterring pedestrians away from any exhibits requiring a low-level, unobtrusive degree of protection. It will discreetly protect against all kinds of footfall from spectators or visitors.

- ✓ High Visibility and excellent transparency
- ✓ Provides limited safety protection for low risk sites
- ✓ Improves the surroundings and the environment offering a cost effective solution where certified solutions are not required
- ✓ Offers a professional appearance for sports pitches

Pararail can be supplied in any RAL colour; optional colour variations on posts and panels enable designs to be customised in contrasting colours. The customisation caters for personal preference and can also be matched to company corporate colours or sports team strips.

Pararail has been designed for ease of installation; it is ideally suited to installation across level ground. Pararail offers independent panel mounting, with each section of fence mounted to its own independent pair of posts. This feature reduces ongoing costs and maintenance burdens. In the unlikely event that a panel needs to be changed due to accidental or deliberate damage, the process is simple and speedy, requiring little professional expertise.

Innovative British Fencing Solutions

Autocad Design

Our state of the art drawing office uses the latest in Autocad design ensuring both compatibility and accuracy with your individual site requirements.

UK Manufacturing

Paramount Steel Fence has manufactured in the UK since 1984. With over 30 years of experience we can provide secure solutions for use in most environments.

Long Life Cycle

All of our products are designed to provide the end user with years of trouble free service. We offer Galvanising, Pre treated systems, and Powder coating in any RAL colour within our product portfolio.

National Deliveries

Operating a national fleet of HGV vehicles including rigid lorries and articulated units, ensures we maintain fast and reliable distribution of our products around the UK.

Specifications vary for the Pararail family of fencing. Typically, the system would be supplied as standard 1.2m high panels and is normally clad with double wire panels from either our Paramesh 656 range, using twin 6mm horizontal wires and 5mm vertical wires, or alternatively the Paramesh 868 range, using 8mm twin horizontal wires with 6mm vertical wires.

The Pararail family features a top rail formed from a 60 x 60 box profile, with the option of a bottom rail to provide added strength where required. The Pararail post is 60 x 60mm and attaches to the fence panel using the Paramesh security clip with a tamper-resistant 8mm secure fixing. Posts are supplied as standard full-length sections designed to be embedded or rooted into concrete.

Optional base plates are available on our Pararail posts to facilitate mounting onto flat surfaces using expanding bolts or chemical fixings.

All Pararail products are compatible with the Paramesh mesh fencing range and can offer a fully architect-designed solution for a wide range of applications. This is one of the most versatile products in the Paramesh portfolio and its proven long life and cost-effectiveness will always provide the end customer with a high degree of satisfaction. However, please note that this product is not suitable for crowd control purposes.

Applications include:

- ✓ Football pitches
- ✓ Hockey pitches
- ✓ Tree surrounds
- ✓ Monument protection
- ✓ Landscaped areas
- ✓ Exhibits
