

Vertical bar fencing

Paramount vertical bar fencing has been designed to offer a configurable specification which can be specifically selected to meet the requirements of most applications.

A popular fence for both commercial and recreational facilities, our vertical bar fencing offers a traditional appearance which is combined with strength, rigidity and durability in one product.

- ✓ Supplied Galvanised to BSEN 1461 with optional powder coating in any RAL colour
- ✓ Choose from our three different types of topping, and our three different types of panel
- ✓ Choose from our various panel types all supplied with tamper proof fixings
- ✓ Optional BS1722 part 9 compliance

This fencing is manufactured in the form of welded panels, with two horizontal rails constructed from flat or RHS steel sections, welded at the intersections. Square or round infill bars can be specified: standard heights include 1.0m, 1.2m, 1.5m, 1.8m, 2.0m, 2.1m and 2.4m.

Custom heights are available to order. Each panel is typically 2.75m wide and contains 22 upright tubes per bay. There is a choice of two round tube sizes of either 25mm or 32mm. The square tube is normally 25mm x 25mm.

Innovative British Fencing Solutions

Autocad Design

Our state of the art drawing office uses the latest in Autocad design ensuring both compatibility and accuracy with your individual site requirements.

UK Manufacturing

Paramount Steel Fence has manufactured in the UK since 1984. With over 30 years of experience we can provide secure solutions for use in most environments.

Long Life Cycle

All of our products are designed to provide the end user with years of trouble free service. We offer Galvanising, Pre treated systems, and Powder coating in any RAL colour within our product portfolio.

National Deliveries

Operating a national fleet of HGV vehicles including rigid lorries and articulated units, ensures we maintain fast and reliable distribution of our products around the UK.

Vertical infill bars can be specified from three different head types, which range from the standard flat top, blunt top or the popular rounded top. For safety reasons we do not recommend the use of pointed tops below heights of 1.8m.

Vertical bar fence panels can be erected on level ground with ease. We offer non-standard posts and stepped or raked panels to overcome issues with varying ground levels.

The vertical bar family can be mounted to wall tops with the use of bolt-down base plates, or alternatively can be built directly into the wall at the time of construction.

Applications include:

- ✓ Garden Centres
- ✓ Parks
- ✓ Residential Areas
- ✓ Heritage Sites
- ✓ Schools
- ✓ Universities
- ✓ General Commercial
- ✓ Prestige Facilities
